

QUOTING AND DESIGN SOFTWARE FOR WINDOW AND DOOR COMPANIES

MEET THE DESIGN DEMANDS OF YOUR CUSTOMERS AT THE BEST POSSIBLE PRICE AND THE SHORTEST POSSIBLE TIME.

SOFT TECH'S V6 SOFTWARE HAS THE POWER TO MAKE THIS HAPPEN.

- ✓ 3D Graphic Configurator handles any geometric shape.
- ✓ Automatic dynamic engineering selects correct materials.
- ✓ Accurate costing and cutting and CNC links.
- ✓ Materials optimisation, shop drawings and much more.
- ✓ Fast re-cost and 'what-if' features.

QUOTING/FRAME DESIGN

- Unlimited volumes of quotes/clients/frames/orders/finishes etc...
- Simple to complex pricing modules - Multiples, Matrices, Suite drive.
- Incremental and standard length material optimisation.
- Select from standard products or create new designs from the drawing board.
- Fast re-cost and 'what-if' features.
- 3D Graphic Configurator - handles any geometric shape (pyramids, rakes, arches, barrels).

PURCHASING

- Quotations converted to jobs are easily converted to Supplier Purchase Orders.
- Orders are XML or flat file formats, and may be encrypted
- Links with Soft Tech's cloud based ordering system, SupplyFlow.

REPORTS

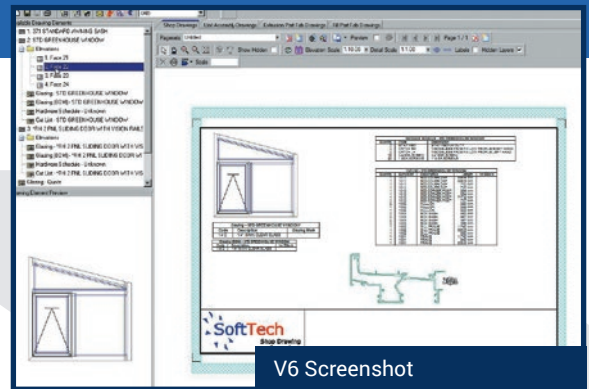

- Reports can be printed directly from the open quotation at the click of a button.
- Standard reports including - Quote, Customer, Fabricator, Office, Installer, Extrusion Cutting Plan, BOM etc...
- Standard reports may be edited using the embedded report writer.

MANUFACTURING

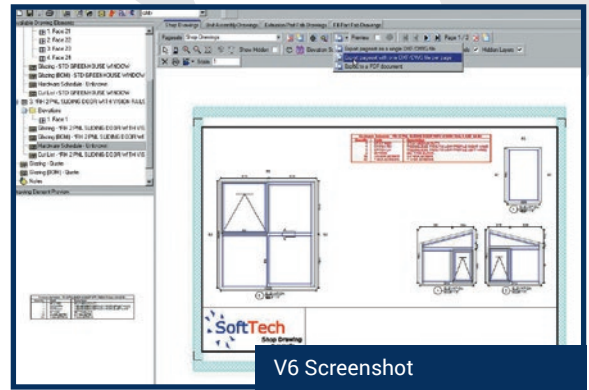

- Dynamic control of machining operation in xyz co-ordinates.
- DXF view of manufactured parts, including completed operations.
- CNC output to machines.
- Operations of Layer, so complex joints with horizontals (or verticals) on each layer can be treated differently.
- Construction grid lines used to reference frames.

DATABASE

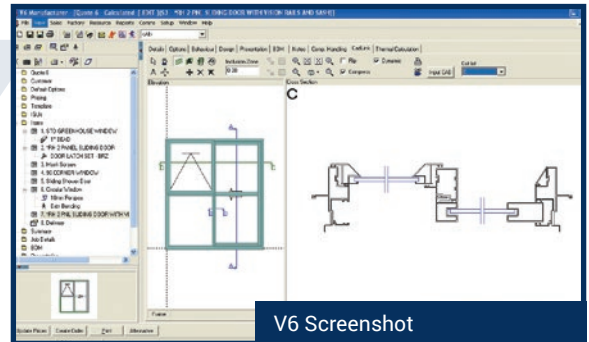

- Oracles, MSSQL.
- Database maintained with ease; V6 uses an Explorer like hierarchical display, with filtering. Search by Product Code, Internal Reference, Description or other product attribute.
- Full import/export management tools to enable importation of bulk raw data.
- Extrusion details imported via DXF files with Batching capabilities.
